Job Posting Information

All Degrees and Disciplines	Yes
Job Title	Research Assistant
Number of Positions Available	1
Salary	12.00

Job Description (include specific position tasks)

You will be working with a lab that is developing a program in Medical Imaging Detector Technologies. The purpose of this collaborative training program is to consolidate medical imaging-related science and engineering research at Lakehead University, University of Waterloo and Univeristy of Saskatchewan into a unified and complete program covering Medical Imaging Techniques and Technologies - an area which is underrepresented in existing Medical Imaging programs in Canada. The uniqueness of our program is in extended collaboration with Canadian companies (start-ups, medium-and large-size) specializing in development and fabrication of Medical Imaging Devises and Technologies as well as in full integration of the training into the working of a Thunder Bay Regional Health Care Centre.

Qualifications

Undergraduate students in Business Adminstration or Natural Sciences, with interest in event planning, marketing, commercialization and independent research.

Job Start Date	2015-04-27 00:00:00.0
